FEATURES

Coaxial, Horn-loaded
Two-Way Active
Max Output 136 dB SPL
LF Device: 15 in. (381mm)
HF Device: 4 in. (101.6mm)
40°H x 60°V Coverage
2 Ergonomic Handles
EP or NL Connectors

GENERAL DESCRIPTION

The Clair Brothers 1.5AM is a high output 15" coaxial stage monitor with incredible low frequency output. This portable, low profile, high output stage monitoring speaker delivers incredible SPL, exceptional vocal reproduction, and unprecedented low frequency reproduction from a small enclosure. Designed for bi-amplification and custom processing (utilizing Clair Brothers amplification and processing), the 1.5AM is in a class by itself. No other product can duplicate its combination of performance, size and packaging.

The component at the heart of the 1.5AM is a custom coaxial assembly with the most powerful combination of woofer and compression driver on the market in this size class. The high frequency compression driver features a 2" throat diameter (4" voice coil diameter), a pure titanium 4" diaphragm with a titanium nitride coating and a neodymium magnet assembly. The driver is joined to proprietary asymmetrical horn for exceptional intelligibility. A 15" carbon fiber reinforced cone transducer provides mid-bass and low frequency reproduction. The combination of our professional high-output components deliver exceptional performance.

Dual rear mounted EP-4 connectors (male and female) allow the use of multiple cabinets from a single amplifier. Low profile styling and flush mounted side handles provides great aesthetic appeal and portability. The speaker grille is constructed of aerospace grade 1/8" gauge perforated aluminum and is specially treated to create a durable exterior finish.

Clair Brothers combines amplification, and proprietary DSP processing in portable racks for all monitor systems. Custom cabling for systems is available and can be pre-wired, labeled and delivered in road cases.

As with all Clair Brothers products, the cabinet is constructed of the finest Baltic birch and finished with a rugged polyurea paint to withstand the most demanding conditions.

ARCHITECT AND ENGINEER SPECIFICATIONS

The loudspeaker shall be a two-way active system featuring a total of two drivers. The low frequency device is one 15 in. driver capable of handling 800 watts of pink noise with a 6 dB crest factor for 8 hours (as per EIA RS-426-A standard). The high frequency device is a 2 in. exit, 4 in. voice coil diameter compression driver joined to a proprietary asymmetrical horn. The 4 in. driver is capable of handling 130 watts (1 kHz to 10 kHz) of pink noise with a 6 dB crest factor for two hours (as per AES-1984 and ANSI S4.26-1984 standards). The signal processing is Clair Brothers proprietary data. The enclosure shall be constructed of premium grade Baltic birch and covered with a durable black polyurea finish. The dimensions shall be 13.79 in. high, 25 in. wide, and 23.11 in. deep. The system weight shall be 60 lbs. (27.2kg). The loudspeaker shall be the Clair Brothers 1.5AM.
